Honorifics Explained

Throughout the Del Rey Manga books, you will find Japanese honorifics left intact in the translations. For those not familiar with how the Japanese use honorifics and, more important, how they differ from American honorifics, we present this brief overview.

Politeness has always been a critical facet of Japanese culture. Ever since the feudal era, when Japan was a highly stratified society, use of honorifics—which can be defined as polite speech that indicates relationship or status—has played an essential role in the Japanese language. When addressing someone in Japanese, an honorific usually takes the form of a suffix attached to one's name (example: "Asuna-san"), is used as a title at the end of one's name, or appears in place of the name itself (example: "Negi-sensei," or simply "Sensei!").

Honorifics can be expressions of respect or endearment. In the context of manga and anime, honorifics give insight into the nature of the relationship between characters. Many English translations leave out these important honorifics and therefore distort the feel of the original Japanese. Because Japanese honorifics contain nuances that English honorifics lack, it is our policy at Del Rey not to translate them. Here, instead, is a guide to some of the honorifics you may encounter in Del Rey Manga.

-san: This is the most common honorific and is equivalent to Mr., Miss, Ms., or Mrs. It is the all-purpose honorific and can be used in any situation where politeness is required.

-sama: This is one level higher than "-san" and is used to confer great respect.

-dono: This comes from the word "tono," which means "lord." It is an even higher level than "-sama" and confers utmost respect.

-kun: This suffix is used at the end of boys' names to express familiarity or endearment. It is also sometimes used by men among friends, or when addressing someone younger or of a lower station.

-chan: This is used to express endearment, mostly toward girls. It is also used for little boys, pets, and even among lovers. It gives a sense of childish cuteness.

Bozu: This is an informal way to refer to a boy, similar to the English terms "kid" and "squirt."

Sempai/
Senpai: This title suggests that the addressee is one's senior in a group or organization. It is most often used in a school setting, where underclassmen refer to their upperclassmen as "sempai." It can also be used in the workplace, such as when a newer employee addresses an employee who has seniority in the company.

Kohai: This is the opposite of "sempai" and is used toward underclassmen in school or newcomers in the workplace. It connotes that the addressee is of a lower station.

Sensei: Literally meaning "one who has come before," this title is used for teachers, doctors, or masters of any profession or art.

[blank]: This is usually forgotten in these lists, but it is perhaps the most significant difference between Japanese and English. The lack of honorific means that the speaker has permission to address the person in a very intimate way. Usually, only family, spouses, or very close friends have this kind of permission. Known as *yobisute,* it can be gratifying when someone who has earned the intimacy starts to call one by one's name without an honorific. But when that intimacy hasn't been earned, it can be very insulting.

Princess Resurrection

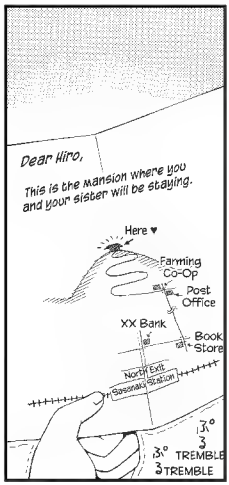
Translation Notes

Japanese is a tricky language for most Westerners, and translation is often more an art than a science. For your edification and reading pleasure, here are notes on some of the places where we could have gone in a different direction, or where a Japanese cultural reference is used.

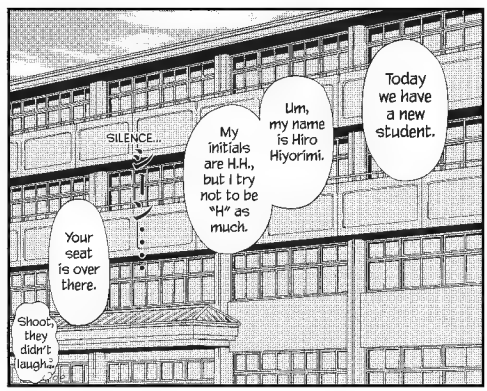


Sasanaki City, page 7

Hiro's looking at a map of Sasanaki City, which, much like the werewolves and invisible men you'll find in the pages of *Princess Resurrection*, is entirely fictional.

"H," page 44

In Japan, someone or something that's perverted is often said to be "H," which is pronounced *ecchi*. There are many theories about why this is so, but the most popular is that it is short for the word *hentai*, which means "perverted or having abnormal tendencies." *Hentai* is often used by English-speakers to describe pornographic material.



Maid outfit, page 61

Sawawa's wearing a maid's uniform because she really *is* a maid, but the girl in the café's surprise and delight at her outfit may have something to do with the "maid craze" that has swept Japan in recent years.

In Japan in 1993, the first video games featuring maids were released. This was probably the earliest depiction of maids in the anime/game culture, but it was not until 1997 when some popular *hentai* video games were released that the *otaku* really started to be interested in maids.

Afterward, anime/media companies started to have "maid cafés" during conventions, where girls dressed up as maids served drinks and light food. That later developed into "maid cafés" that are open year-round in major cities. Currently there are also "maid massages," where a girl dressed up in a maid costume gives you a massage.

Preview of Volume 2

We are pleased to present you with a preview of Volume 2 of *Princess Resurrection*. It will be available in English on August 28, 2007. For now you'll have to make do with the Japanese!
